

3 MYTHS ABOUT GMO's

SOURCE: <http://www.nongmoproject.org/learn-more/gmo-myths-and-truths/> BY: [facebook.com/GetInvolvedYouLiveHere](https://www.facebook.com/GetInvolvedYouLiveHere)

myth: *GM foods are safe to eat*

TRUTH: Studies show that GM foods can be toxic or allergenic.

myth: *Genetic engineering is just an extension of natural breeding*

TRUTH: Genetic engineering is different from natural breeding and poses special risks.

myth *GM Bt insecticidal crops only harm insects & are harmless to animals and people.*

TRUTH: GM Bt insecticidal crops pose hazards to people and animals that eat them. Bt toxin protein may not be broken down harmlessly in the digestive tract.
