

*Environmental Working Group found 87 chemicals in **Febreze** while Proctor and Gamble only disclosed 3. Febreze contains many known endocrine disruptors, neurotoxins, and carcinogens.*

Inhaling Chemicals is bad for your health!

Here are a few of the toxic chemicals in Febreze: BHT, Acetaldehyde, Neurotoxic Fragrance, Methyl-Pyrrolidone, Butylphenyl Methylpropion, Diethelene Glycol Mono ethyl ether, Hexyl Cinnamal, Benzaldehyde and 77 more!

Think before you spray!

Try opening a window or eliminating the odor, instead!
